½ session of MRI

1 session of CT

1 session of ultrasound

1 session of reporting

Jan 2002 to present

**Consultant Interventional Radiologist
The John Radcliffe Hospital Oxford.**

As the first appointee in the vascular team , I have played a lead role in the setting up of the Vascular Service for Gateshead and South of Tyne. This includes the establishment of a vascular laboratory run by three trained vascular sonographers, under my supervision.

I have introduced and carry out a wide range of vascular, hepatobiliary and other non-vascular interventional procedures for the Queen Elizabeth Hospital and in 2002 to Oxford. I have developed aortic stent grafting in close collaboration with my two surgical colleagues and we have been carrying these out successfully since April 1998 and introduced these to Oxford in 2002. I place a wide range of Gastro-intestinal stents including gastric, small bowel and colo-rectal stents. We are involved with the national Colo-rectal stenting trial.

I have an interest in percutaneous tumour ablation and have developed a technique with my colo-rectal colleagues using jet port Chemo-embolization of liver tumours which we have been using since 1997.

Most recently I have set up with my colleagues and nursing staff a pre-assessment clinic to prepare, counsel and consent patients prior to interventional procedures. A follow up clinic is planned.

I have a strong interest in clinical research and have developed several research projects, some of which are funded by local research grants.
